I'm a UI/UX designer with 5+ years of experience in web and mobile products. I specialize in creating intuitive interfaces and optimizing key user flows. I use a product-oriented approach to improve usability, user engagement, and conversion. Currently, I'm working on my own project [gunlib.app](#) — an interactive knowledge base for firearms.

EXPERIENCE

- GunLib

Apr 2026 – Present

Co-founder & Product Designer · DefTech · (Part-time / Pet Project)

- Conducted Product Discovery: ideation, competitor analysis, interviews with the target audience (firearms instructors at the Training Center), and user scenario development.
 - Collaborated with the developer to design the information architecture and structure for fast search and comfortable display of specific data: characteristics, weapon diagrams, files, and instructions. I used the Quasar design system for a quick MVP launch and adapted the design for further AI-assisted development.
 - Implemented product analytics using AI tools: created a project knowledge base in Obsidian; connected Google Analytics, Google Tag Manager, Google Search Console, and Microsoft Clarity; set up Codex access for analysis and further UX improvement based on real user data.
 - Currently designing a comprehensive ballistic calculator interface and an extended interactive zeroing module.
- Trexim

Mar 2026 – Jun 2026

Product Designer · Logistics SaaS · Full-time

- Led the design team: coordinated the team, prioritized tasks, and mentored designers.
 - Defined workflows and strategic direction. Structured the design inherited from the previous outsourced team and optimized the Ant Design system to ensure consistency and future scalability.
 - Participated in cross-functional Product Discovery sessions with PM, BA, and the development team to align the vision and support a fast MVP release.
 - Led the design of a native mobile app for drivers, considering specific needs and constraints of drivers and following Material Design guidelines.
- Perfectorium Web Agency

Sep 2021 – Feb 2026

UX/UI Designer · Web Agency · Full-time

- Worked on a wide range of design projects, including web and mobile applications (dashboards, marketplaces, and complex systems).
 - Introduced mobile design as a direction at the agency, expanded the team's competencies, and contributed to positive client feedback and repeat collaborations.
 - Created and maintained client project UI kits and design systems to ensure consistency and optimize future development. Developed implementation specifications and guidelines.
 - Created wireframes of varying detail levels as well as interactive prototypes.
 - Developed application architecture and key scenarios for utility systems.
 - Conducted research using heuristic evaluation, competitor analysis, usability testing, A/B testing, and in-depth user interviews.
- Smilodo

Jan 2020 – Sep 2021

UX/UI Designer · Website Builder · Part-time

- Collaborated with developers to improve and redesign the website builder interface (admin and client parts).
 - Improved key user flows and proposed UX improvements to increase usability and flexibility.
 - Created scalable templates and design patterns for customizable layouts.
 - Defined the visual style and ensured consistency across the platform.
 - Developed responsive e-commerce interfaces and supporting marketing materials.
- Freelance

May 2019 – Jan 2020

skillup.ua — curator assistant, designer

- Designed print materials and presentations, organized company events, and communicated with leads.

autohelp.pl.ua

- Designed a landing page for a towing service and administrative tools.

keratin.com.ua

- Created logos, illustrations, business cards, and print materials.
- ## EDUCATION & CERTIFICATES
